Of the ECLIPSES this Year, 1692.

THere will be five Eclipſes this Year, *viz.* three of the Sun, and two of the Moon.

The firſt will be a total Eclipſe of the Moon on *January* the 23 day, about two a clock in the afternoon, in the 14 degree of *Leo*, inviſible to us. The ſecond will be of the Sun, on February the 9. about 4 a clock in the morning, in 29 degree of *Aquarius*, inviſible to us. The third will be of the Moon, in the 6 degree of *Aquarius*, on the 18 of July, as followeth,

	Days	h.	m.	ſ.	
Apparent time of true Oppoſition, *July*	18	3	10	21	morning
Eclipſes begins	18	2	39	05	
Greateſt Obſcuration.	18	3	15	27	
Eclipſes ends at *Edinburgh*,	18	4	51	49	

The fourth will be a ſmal Eclipſe of the Sun on the ſecond day of *Auguſt*, about half ten a clock in the forenoon in the 20 degree of his own houſe *Leo*: which Aſtrologers ſay, betokeneth no good to thoſe perſons or places under *Leo*. This Eclipſe will be viſible to us if wel obſerved. The 5 and laſt Eclipſe is of the Sun, December 27, about 2 in the afternoon, being very ſmal, and ſcarcely to be ſeen of us.

Johns day, S. Davids fair at Gerry the first Tuesday after Christmass.

An Alphabetical Prophesie found in Dublin, *in the year* 1689. *kept secret then, because of the height of Popery: Shewing what should fall out in* 1692.

THese Letters five *P. R. J. W.* and *L.*
Together strive which of them shall prevail;
P. claims pre-eminence over *R. J. L.* and *W.*
For *I.* and *R.* makes all the World ado:
P. pull'd down shall be, but *R.* shall rise,
J. L. shall fall, and *W.* shall gain the Prise:
A. ante *M.* shall then hold *E.* his staff,
And keep at under *S. G J.* and *F.*
D. then shall dance, and *G.* shall glorifie,
And *B.* shall boast of this great Victorie.
N. after all recover shall the day,
And *O.* his Banner valiantly display:
No weapon fram'd 'gainst *Z*, prosper shall,
Tho' other Nations they kept under thrall.
Therefore, good people, strive, yea, strive, I say,
For that above, which never will decay.

Note, All Letters here, except *Z.* and *W*,
Are those the *Irish* Characters allow,
And when they do admit them with the rest,
Then may the Land again be at the best.

For the Readers better understanding, the Author has set down the Denotation of these Letters.

P. *Popery*, R. *Reformed Religion*, J. *James*, L. *Lewis*, W. *William*, I, *and* R. *in the fourth Line*, *Interest and Religion*; A. *ante* M. *Anti-Monarchy*, *or State Government*, E. *Europe*, S. *Spain*, T. *Turkey*, C. *Cham of Tartary*, F. *France*, D. *Denmark*, G. *Germany*, B. *Britain*, N. *Norway*, O. *Orange*, Z. *Church of GOD.*

Five cunning Watchers.

The Cat will watch the Mouse.
The Kite will watch the Chickens.
The Fox will watch the Geese.
The Wolf will watch the Lambs.
And the Thief will watch a true man.

There are five cunning sort of Cheaters.

The Owl will cheat the Mouse,
The Fowler will catch the Kite,
The Shepherd will catch the Wolf,
The Trap will catch the Fox,
And the Gallows will catch the Thief.

A Table shewing the hour and min. of high water at *Leith*, for every day of the Moons age, increasing or decreasing.

Moons age. increas.	Moons age. decreas.	Full Sea at *Leith* hours.	Full Sea at *Leith* min.

A Table for Leith, *Corrected by* M. J. S. *Astrolog.*

Shewing the Hour and Minut of High-water at Leith, *for every day of the Moons Age, Increasing or Decreasing.*

The Use. Seek the Moons Age in the first and second Column of the Table, and in the two last Columns you have the true time of full Sea at *Leith.*

Example, To find the full Sea the 6 day of *May*, 1692. I find the Moons Age by the following Table to be 16, which I find in the second Column of this Table, and against it in the last Column I find 3 Hours and 3 Minuts; the true time of full Sea required.

A ready Table shewing the Age of the Moon every day throughout this Year, 1692.

9	0	10	09	9000	540	00	00
10	0	12	00	10000	600	00	00

The Use.

TO find the Annualrent of any principal sum by this Table, If the principal sum be under 10 L. seek it under the 1 Column of the Table and towards the right hand in the second Column, you have the Annualrent thereof. But if the principal sum be above 10 L. seek the tens, hundreds or thousands in the third Column, and towards the right hand in the fourth Column you have the Annualrent belonging thereunto; and if there be any odd pounds and shillings, seek them as before, and add their Annualrent to that which you have found, and the total is the Annualrent required.

1 *Example.*

Suppose it be required to find the Annualrent of 138 L. 13 sh. for a year: work thus.

L.	Pr,	L.	sh.	d.	
100		6	00	00	Interest
30		1	16	00	or
8		0	09	07	Annualr.
12 sh.		0	00	09	
138 L. 13 sh		8	06	04	Totall.

To find the Annualrent of any Sum above 10000 L. which is not in this Table, consider that every 10000 L. thereof is 600 L. Annualrent, and find the rest as in the Table.

To find the Annualrent of any Sum for one two or three month, &c take the twelve part of that, which a year yeilds, and that will be the Annualrent for a month, its double for two months its triple for three, &c.

FINIS.
